

DATASHEET Hesco Rock Face

HESCO ROCK FACE is a PAS 68 rated security barrier that integrates with the built environment, by allowing architectural fill material to be used in the front sections the kits provide. A geotextile-lined unit with 12" wide unlined front section. The geotextile-lined rear section allows the use of more economical fill such as earth, sand or gravel. All MIL3 RF12 units are supplied with bracing ties. Lids are optional.

GENERAL SPECIFICATIONS

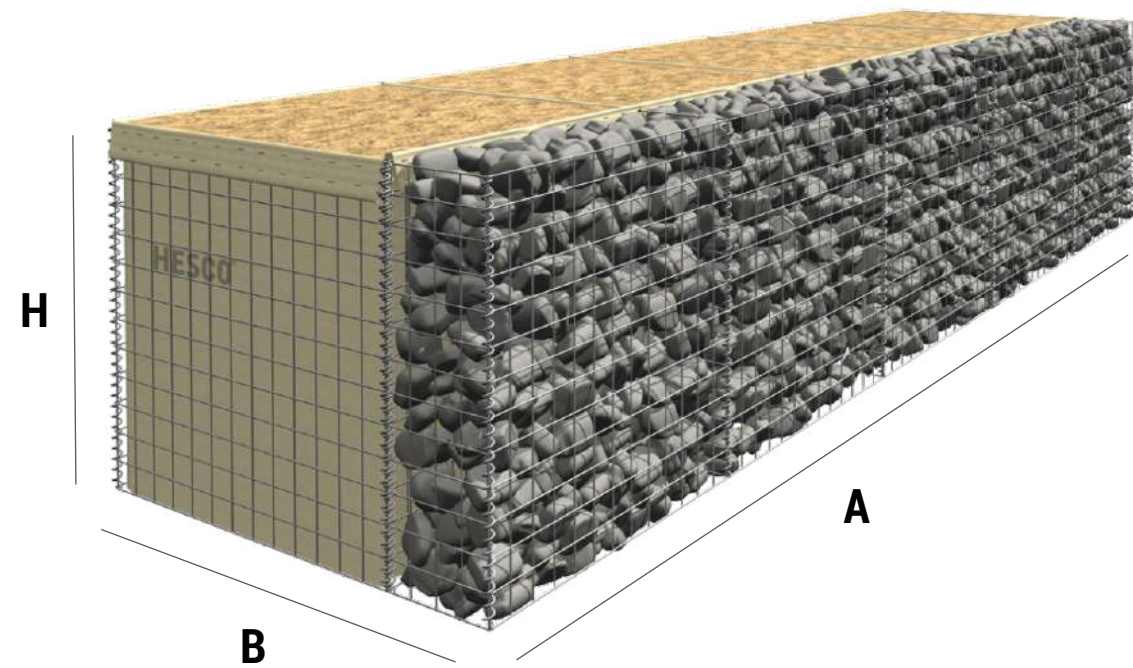

Geotextile-lined welded mesh barrier coated to ASTM A 856. All wires conform to BS EN 10218-2:2012.

Zinc-Aluminum coatings are to BS EN10244-2:2009, where appropriate.

The geotextile is a heavy-duty and non woven.

Hesco Rock Face System provides protection for: industries, civil protection, military units, rescue teams, regions, municipalities.
